

Reavis High School

Curriculum Snapshot/Cover Page for Web Design II

Unit 1: Frames

15
days

Students will understand the steps used to design a frame structure. Students will understand Framesets and frame definition files. Students will be able to plan and layout a frameset

Unit 2: Image maps

15
Days

Students will understand the two components of an image map and be able to implement an image map. Students will understand how to use <map> and <area> tags in creating a web page.

Unit 3: Forms

15
Days

Students will understand the different form controls and their uses. Students will be able to create a selection menu with multiple options. They will also use the <fieldset> tag to group form information.

Unit 4: Cascading Style Sheets

15
Days

Students will be able to describe the three different types of cascading style sheets. They will create inline, embedded and external style sheets. Students will understand how to define style classes.

Unit 5: Flash

20
Days

Students will use flash to create animated objects to use in web pages. They will work with layers, timelines and tweens to add movements to and create Flash files.
