

Unit 1: The Driving Task

22
Days

Each student will learn the fundamental skills of driving which include responsibility and low risk task-taking in this unit. Students will register for their permits in the classroom using the "In the drivers seat workbook" Students will learn traffic signals, lights and pavement markings. They will learn the right of way at intersections. Each student will understand the three phases of drivers education (classroom, range & road).

On the range students will be introduced to pre-driving checks. They will learn to drive forward and reverse. Students will interact at intersections and learn to lane change properly.

Road driving will consist of residential driving while using the skills necessary to succeed in that driving environment.

Unit 2: Controlling the Vehicle

17
Days

In the classroom using the "In the drivers seat workbook" students will learn the proper steps to lane changing and passing of vehicles. Students will understand general laws to speed limits and the proper steps to different types of parking. Students will learn the important strategies when driving in adverse conditions and handling emergencies.

On the range the students will learn to back around corners and angle park left and right.

Road driving will consist of suburban driving in light traffic while using the skills necessary to succeed in that driving environment.

Unit 3: Driving in Different Environments

17 Days

In the classroom using the " In the drivers seat workbook" students will understand the different driving environments (urban, rural & expressway) and the necessary strategies needed to succeed in those environments. The students will learn the importance of sharing the roadways with others such as pedestrians, motorcycles, buses and trucks.

On the Range students will learn to park uphill and downhill. They will learn how to execute a proper 3 point turn.

Road driving will consist of rural and simulated city driving while using the skills necessary to drive in that environment.

Unit 4: Being a Responsible Driver

17 Days

In the classroom using the " In the drivers seat workbook" students will understand the affects and consequences with driving under the influence of drugs or alcohol and how distractions affect a persons decision making. Students will understand how physical and emotional senses play a role in driving. Students will understand financial , safety and environmental responsibilities and will learn the proper steps to take if they are involved in an accident.

On the range students will learn to parallel park.

Road driving will consist of expressway driving while using the skills needed to drive in that environment.

Unit 5: Drivers Education Reflection

7 Days

In the classroom students will learn how to read maps and understand directions. Students will learn about organ donation. Students will be given the necessary information to take to the Secretary of State facility. They will also be given study sheets for the final exam.

Road driving will be completed in all 5 driving environments, allowing the students to improve on all the necessary skills to become a more confident and skillful driver.
