

Reavis High School

Curriculum Snapshot/Cover Page for Drivers Education

Unit 1: The Driving Task

22
Days

Each student will learn the fundamental skills of driving, which include responsibility and low risk task-taking in this unit. Students will register for their permits. In the classroom chapter one will be covered. Each student will understand the three phases of drivers education (classroom, range & road).

On the range students will be introduced to pre-driving checks. They will learn to drive forward and reverse. Students will interact at intersections and learn to lane change properly.

Road driving will consist of residential driving while using the skills necessary to succeed in that driving environment.

Unit 2: Controlling the Vehicle

17 Days

In this unit the classroom will cover 4 chapters. Students will understand how to manage risk using the (IPDE) identify, predict decide and execute process. They will understand the right of way at intersections. Students will understand natural laws and the effects of car control. The students will learn the importance of sharing the roadways with others such as pedestrians, motorcycles, buses and trucks.

On the range the students will learn to back around corners and angle park left and right.

Road driving will consist of suburban driving in light traffic while using the skills necessary to succeed in that driving environment.

Unit 3: Driving in Different Environments

17 Days

In the classroom the students will cover 5 chapters. The students will understand the different driving environments (urban, rural & expressway) and the necessary strategies needed to succeed in those environments. Students will learn the necessary strategies when driving in adverse conditions and how to handle emergencies.

On the range students will learn to park uphill and downhill. They will also learn how to execute a proper 3 point turn.

Road driving will consist of rural and simulated city driving while using the necessary skills to drive in those environments.

Unit 4: Being a Responsible Driver

17 Days

The classroom phase will consist of 3 chapters in the text book. Students will understand the affects and consequences when driving under the influence of drugs or alcohol and how distractions effect a persons decision making. Students will understand how physical and emotional senses play a role in driving. Students will understand financial , safety and environmental responsibilites and will learn the proper steps taken if they are involved in a collision.

On the range students will learn to parallel park.

Road driving will consist of expressway driving while using the necessary skills needed to drive in that environment.

Unit 5: Drivers Education Reflection

7 Days

In the classroom students will learn how to read maps and understand directions. Students will learn about organ donation. Students will be given the necessary information to take to the Secretary of State facility. They will also be given study sheets for the final exam.

Road driving will be completed in all 5 driving environments, allowing the students to improve on all the necessary skills to become a more confident and skillful driver.
